

# Tavistock Primary and Nursery School

Year 6  
W/B 13/07/20

 English Why not make a book this week? You could choose to make a book on any topic that interests you or if you are into story writing, why not write a series of books including a prequel and a sequel?

You could use a book you love to inspire you by writing another adventure for your favourite character. Or write a sequel or prequel to it. You could make a series of mini-books and see how small you can get them - have a search for miniature books on the internet - they are fascinating. Read independently and keep a record of the number of pages you have read.

**AIR - Think about a character you know well. Make notes about where and what they would be doing in the future. Try hard to explain your answers, using evidence from the text to support your answers..**

- Listen to a story being read.
- Use the 5/6 spelling list (available in your home school diary or online) to practise how to spell them.,

Watch Newsround and discuss the topic with a member of your family.

## Maths

- Practise your time tables on Rockstars, use Numbots for calculation practice
- Practise multiplying and dividing by 10,100 and 1000 (*up to tens of millions*)
- Daily Arithmetic practice MyMiniMaths website.

## Maths Game

Draw a 6 x 7 grid and fill it with numbers below a 100 like the one below.

26	54	47	21	19	5	38
9	25	67	56	31	49	13
39	41	6	1	75	28	90
14	50	81	23	43	4	37
45	29	72	34	7	58	17
36	2	55	11	22	40	42

- Roll a dice 3 times so that you have 3 different numbers.
  - Use these 3 numbers to make one of the numbers on the grid.
  - You can add, subtract, multiply or divide to reach one of these numbers.
- For example if you roll a 3, 4 and 6, you could do  $4 \times 6 - 3$  to make 24.
- Mark the numbers to manage to calculate with a cross. Take it in turns with a friend or family member.
  - The first one to get 4 in a straight line (horizontally, vertically or diagonally) wins!

## Science and Foundation subjects

Investigate the structure of the Earth. Try to learn at least two facts about each of the three layers. Make up a mini quiz about it and test your friends and family - see who gets all of the answers right.

You could look back over all your home learning and design a longer quiz with different rounds? It would be interesting to see which family member has learnt the most!

For art, have a look at some portraits. Have a go at drawing portraits of your family members. This web site provides a tutorial on how to draw a face - you may want to practice this first.

<https://www.erikalancaster.com/art-blog/how-to-draw-a-face-for-beginners>

Then try a self portrait. Have a go at emulating Picasso's style. You could draw your face from the front and then again from the side, cut them into pieces and have a go at re-assembling one face from the two originals!

## Websites

<https://spellingframe.co.uk/> Work your way through the spelling rules for year 5 and 6  
<https://www.topmarks.co.uk/maths-games/7-11-years/times-tables>  
<https://www.topmarks.co.uk/maths-games/hit-the-button>  
<https://play.trockstars.com/> Make sure you login using our school name

## Exercise - Exercise away from home

Now that we have more freedom outside of the house, have a go at doing some activities in different places. Play games in the park/at the beach/on the moors, or ride a bike if you have one.
